Institutional violence in Swedish compulsory care: results from a multiple case study using PRISM

Background, preliminary findings and general experiences

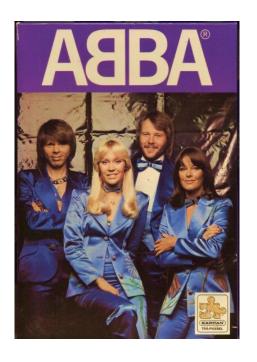

Presenters

- →Gunilla Nötesjö, M.Sc., Chartered psychologist and Analyst at SiS, Project manager PRISM
- ★Fredrick Asare, M.Sc, Chartered psychologist and analyst at SiS

Sweden...?

Organisational structure

- →36 institutions (25 residential units for young people and II institutions for substance and alcohol abuse)
- ★SiS currently provides 1028 beds(345 beds for substance abusers and 683 for youths)
- ★A total of 4000 staff members are employed at SiS.
- Residents are upon approved referrals allocated to available and suitable institution by unit at the head office.

What is SiS?

- ★Swedish government agency responsible for compulsory care for young people with severe psychosocial difficul ties and for adults with severe substance abuse
- Residents are referred to SiS by social services and health care services.

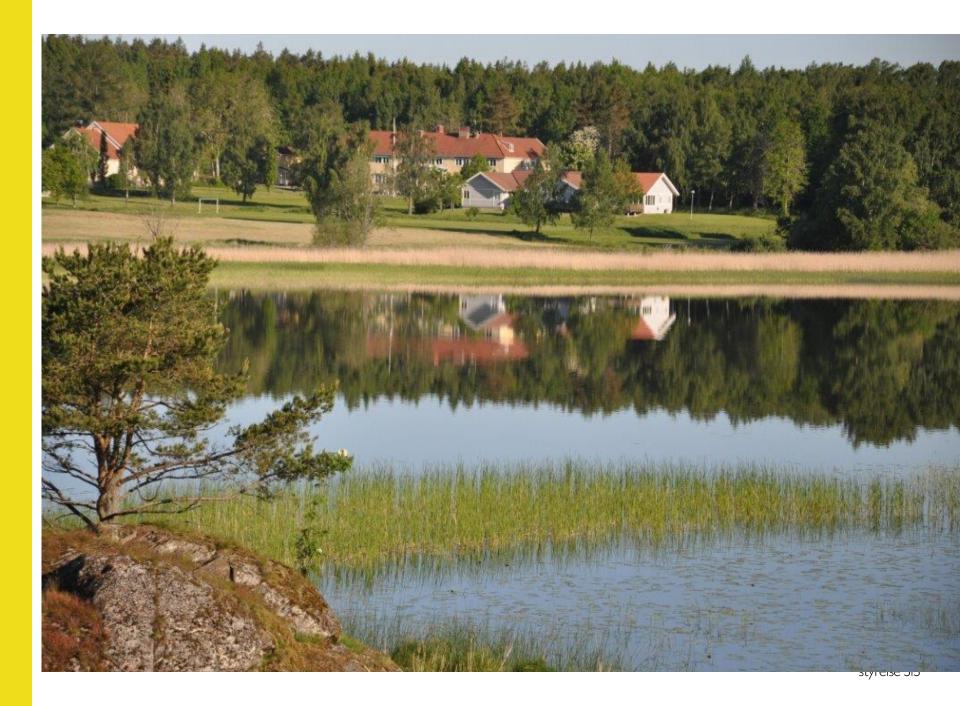

styrelse SiS

Background to using PRISM in SiS

- → Criticism in Swedish media
- ★Audits revealed high levels of violent incidents
- ↑Inappropriate use of authorities and questionable culture
- ★Lack of systematic method to assess risks

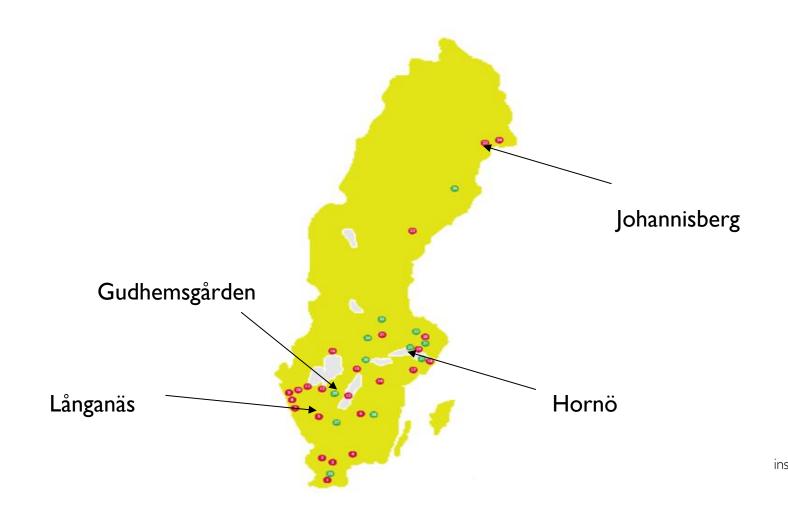

Trying out PRISM – our goals

- ◆Overall objective : to find out if PRISM can help to improve violence-prevention in SiS?
- ★ Can the institutions within SiS manage the challenges that PRISM pose?

Getting started: February 2015

styrelse SiS

March 2016

Finally!

- → 4 PRISM reports,

 completed with local risk

 management plans
- Sharing and discussing results with senior management.
- Risk factors and identified needs on organisational level

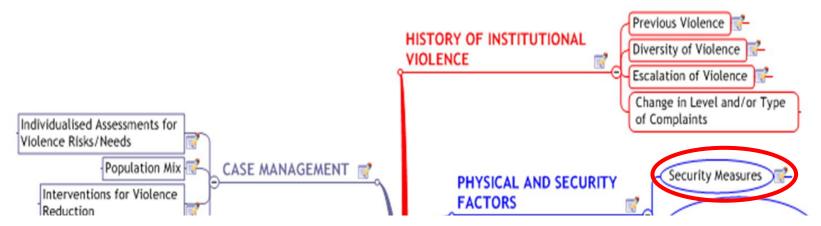

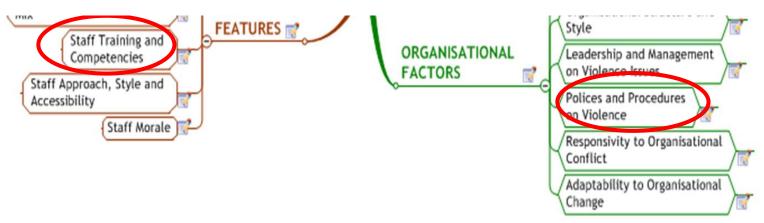

Ethos and priorities

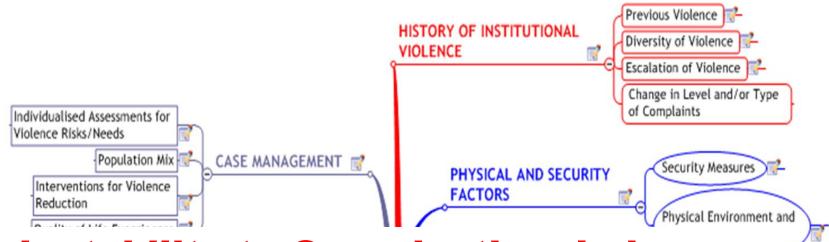

Having a strong opinion isn't good enough – We have to walk the talk!

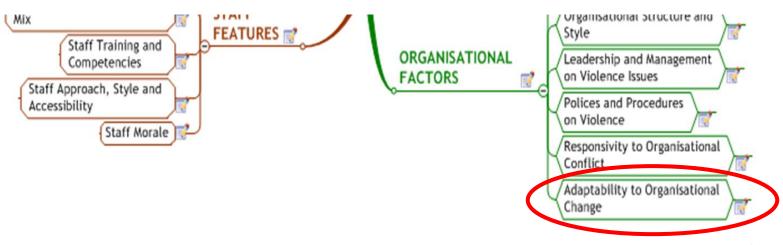

Behind the gap between guidelines and practice-problematic attitudes and lack of knowledge

Adaptability to Organisational change -costs and benefits of the SiS model

Some other experiences from using PRISM in SiS

- → High ecologic validity
- ★Essential to organize and plan how PRISM is employed
- Assessing required resources and training staff on how to use PRISM
- ★External resources in the local teams to avoid bias when evaluating risks

Thank you!
